

MEASURES TO PREVENT
RUGOSE TOMATO VIRUS

CULTIVATION RECOMMENDATIONS

1

CULTIVATION RECOMMENDATIONS:

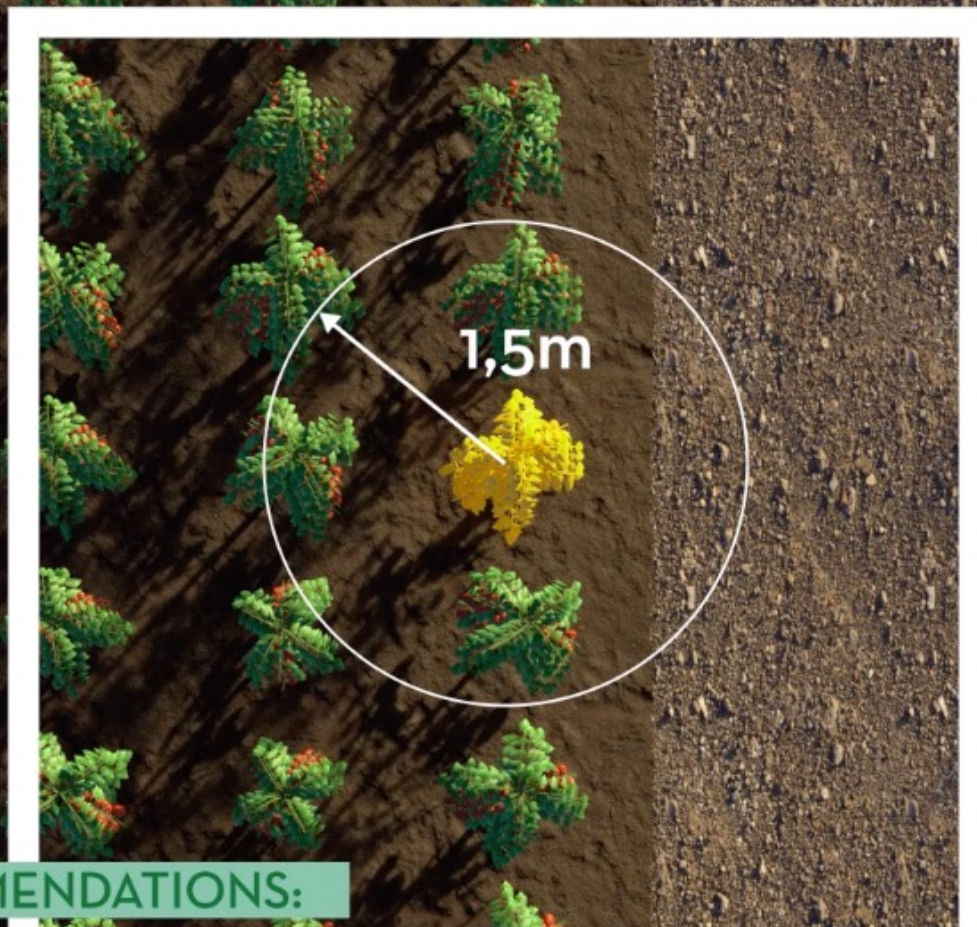

Use certified seeds and plants from trusted nurseries.

2

CULTIVATION RECOMMENDATIONS:

Handle plants or fruits only when absolutely necessary and always with protective gloves, changing them at the slightest suspicion of abnormal plants or whenever moving between greenhouses.

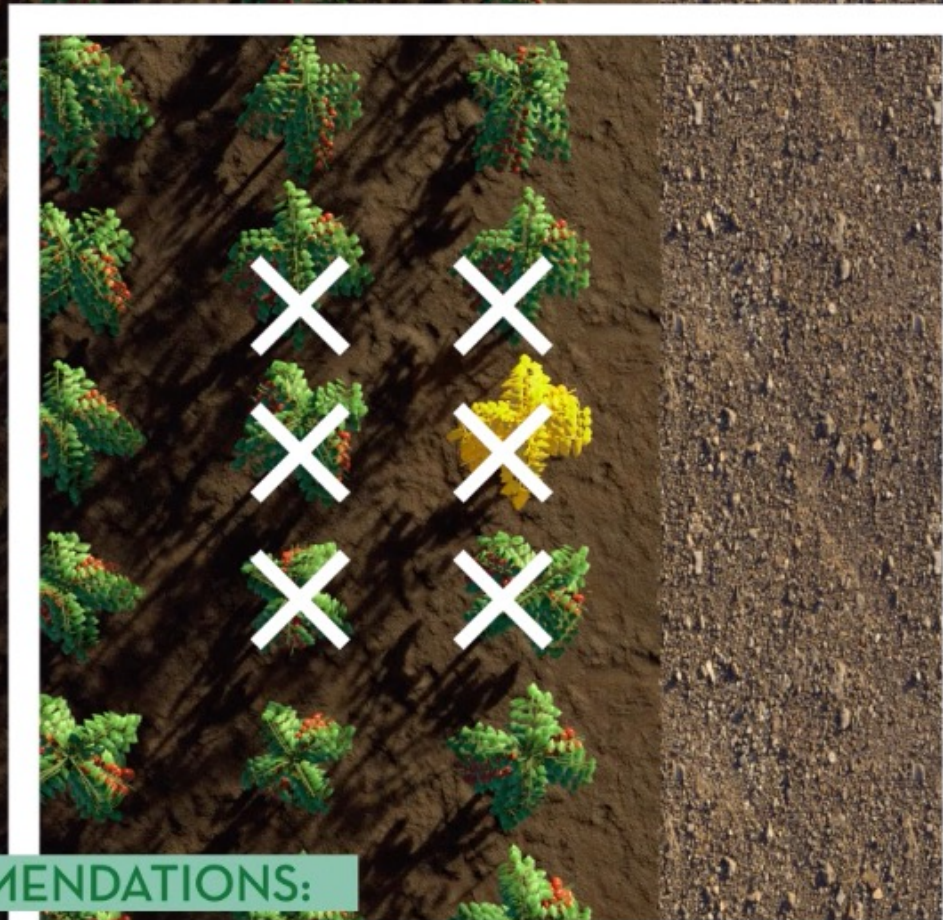

3

CULTIVATION RECOMMENDATIONS:

Regularly inspect plants. If symptomatic plants are detected, remove all plants within a minimum radius of 1.5 meters from the outermost infected plant and quarantine the perimeter.

4

CULTIVATION RECOMMENDATIONS:

Remove and dispose of all infected plants, residues, and contaminated substrate according to local authorities' regulations. Sterilize tools and containers.

5 CULTIVATION RECOMMENDATIONS:

Transport plant or fruit parts in sealed plastic bags that should only be opened in controlled conditions.
