

SOLEMIO

The sweetest flavour

PLANT

Plant with medium/high vigour, easy flowering and setting of fruit. Compact plant structure, with shorter internodes and clusters, with each cluster divided into one or three shafts.

FRUIT

Great flavour reaching °Brix from the start of cultivation. Homogeneity of the fruit in the cluster, which maintains its size throughout the entire growing cycle. Productive despite its cluster structure, due to the higher number of clusters. Good colour and preservation.

RESISTANCES

HR: ToMV / Fol:0 **IR:** TYLCV / Mi / Ma / Mj / ToBRFV
