RESEARCH

Semillas Fitó has a very innovative equipment distributed in five research centers around the world. Based on specific needs of weather and market conditions, researchers work with the most advanced technologies in breeding and biotechnology. Thanks to these innovations, Semillas Fitó can launch new varieties that add value to the food supply chain.

SERVICE

Since 1880, Semillas Fitó has been working very close to its customers to help them develop their businesses. Semillas Fitó counts with an experienced team that helps customers to maximize farm efficiencies. This personalize service covers not only variety selection and crop management, but advices about shipping, logistics and marketing.

WARRANTY

At Semillas Fitó, there are experts on many types of tomato, pepper, eggplant, cucumber, melon, watermelon, squash, bean and sweet corn. The extensive knowledge on these species has made them world leaders. The Fitó warranty is complemented by a highly committed production department and a very rigorous quality control, which goes above and beyond to achieve maximum quality standards, in many cases going even further and raising the bar on quality to a very high level where competitors won't bother to go.

OUR COMMITMENT TO **RESEARCH** AND **SERVICE** IS THE KEY TO OUR **LEADERSHIP** IN MANY CROPS SUCH AS HALF-LONG EGGPLANT, YELLOW MELON AND DUTCH CUCUMBER

TOMATO

TOMATO

SIKANDER

F1

Long shelf life, TYLCV tolerance & high yield, highly productive.

 **Type:** Indeterminate, excellent shelf life.

 **Color:** Deep red.
Weight: 100-120 g.
Shape: Round-flatish, fruits in clusters.

 **HR** ToMV / TSWV / Fol: o, 1 / Vda / Vd

 **IR** TYLCV / Ma / Mi / Mj

SUDARSHAN

F1

Determinate, TYLCV tolerance & high yield, tolerance to heat.

 **Type:** Determinate and very high fruiting, good for long distance shipping.

 **Color:** Deep red.
Weight: 80-100 g.
Shape: Flat round acidic.

 **IR** TYLCV

CITRON

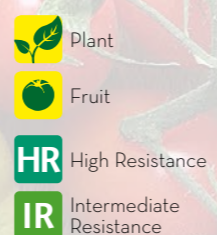

F1

Semi-determinate, flat round, firm juicy fruit, highly productive, bright red attractive fruits sour taste.

 **Type:** Semi-determinate, flatround fruits dark green shoulder, acidic.

 **Color:** Bright red fruits.
Weight: 90-100 g.
Shape: Flat round, uniform shape.

 **HR** ToMV / Fol: 2 / Va  **IR** TYLCV

RUDRA

F1

Long shelf life, TYLCV tolerance, fruits in cluster, highly productive.

 **Type:** Indeterminate, excellent shelf life.

 **Color:** Bright red, fruits in clusters.
Weight: 100-110 g.
Shape: Oval.

 ToMV / Fol: o, 1 / Va / Vd  TYLCV

GOLU

F1

Bright red, high yield & TYLCV tolerance, highly productive.

 **Type:** Indeterminate, excellent shelf life.

 **Color:** Bright red, acidic in taste.
Weight: 90-100 g.
Shape: Flat round.

 ToMV / TSWV / Fol: o, 1 / Va / Vd
 TYLCV / Ma / Mi / Mj

RUBY RED

F1

High yield, round red fruit & TYLCV tolerance, highly productive.

 **Type:** Indeterminate, excellent shelf life.

 **Color:** Bright red, fruits in clusters.
Weight: 130-180 g.
Shape: Flat round.

 ToMV / TSWV / Fol: o, 1 / Va / Vd
 TYLCV / Ma / Mi / Mj

BANGALORE RED

F1

Semi-determinate, flat round, firm, bright red color, high yield, sour taste very productive.

 **Type:** Semi-determinate, flat round, firm.

 **Color:** Bright red.
Weight: 90-100 g.
Shape: Flat round.

 ToMV / Va / Vd  TYLCV

HERITAGE

F1

Semi-determinate, flat round, deep red color, firm fruits, high yield, uniform shape, uniform fruits, dark green shoulder when immature, sour taste.

 **Type:** Semi-determinate, flat round, dark green shoulder.

 **Color:** Deep red.
Weight: 90-100 g.
Shape: Flat round.

 ToMV / Va / Vd  TYLCV

CHAMPION F1

Semi-determinate, oblong shape, bright red color, very firm, high yield, uniform shape, good foliage cover.

Type: Semi-determinate, square round, very firm & attractive fruits.

Color: Bright red.
Weight: 95-100 g.
Shape: Oblong shape.

ToMV / Va / Fo.2 TYLCV

SWEET BERRY F1

Oval-plum shape fruits, delicious taste, good for salad, high yielding.

Type: Indeterminate, cherry.

Color: Attractive deep red.
Weight: 15-18 g.
Shape: Oval shape.
Taste: Sweet & sour.

Fol: o / Va / Vd

PRIDE F1

Semi-determinate, flat round with dark green shoulder, firm, sour taste, excellent quality.

Type: Semi-determinate.

Color: Bright red, green shoulder.
Shape: Flat round.
Firmness: Firm.

ToMV / Va TYLCV

DEEP F1

Semi-determinate, flat round, uniform shoulder, firm, deep red, very productive.

Type: Semi-determinate.

Color: Bright red.
Firmness: Good firmness.

ToMV / Va TYLCV

POLYHOUSE **POLYANA** F1

Indeterminate, flat round, deep red color, good firmness, high yield, uniform shape, dark green shoulder, sweet & sour taste..

Type: Indeterminate, flat round, dark green shoulder.

Color: Deep red.
Weight: 160-180 g.
Shape: Flat round.

ToMV / Fo Va TYLCV

SWEET PEPPER

SWEET PEPPER

NANDA

F1

Early harvest, high yielding for open field.

Type: Semi-erect & open, long transportability.

Color: Dark green, long shelf life.

Weight: 225-250 g.

Shape: Blocky with 4 lobes, thick skin uniform.

SHIMLA GREEN

F1

Suitable for open field & indoor cultivation. Green, uniform fruits, thick skin, good for long transportation.

Type: Semi-erect open, firm, dark green fruits.

Color: Dark green.

Weight: 210-240 g.

Shape: Blocky uniform four lobbed fruits.

Firmness: Good firmness, suitable for transportation.

Plant

Fruit

High Resistance

Intermediate Resistance

POLYHOUSE  **RED STAR** 

Attractive red blocky tolerant to TSWV.

 **Type:** Semi-erect open.

 **Color:** Green fruits turn bright red at maturity.
Weight: 250-280 g.
Shape: Blocky with 4 lobes.

 Tm: 0-3  TSWV

POLYHOUSE  **YELLOW QUEEN** 

Attractive yellow blocky tolerant to TSWV.

 **Type:** Semi-erect open.

 **Color:** Green fruits turn bright yellow at maturity.
Weight: 230-250 g.
Shape: Blocky with 4 lobes.

 Tm: 0-2

HOT PEPPER

HOT PEPPER

HOT KING

F1

Dual purpose & suitable for both fresh and dry chilli.

Type: Semi-erect open.

Color: Very attractive, lustrous green fruits turn shiny red on maturity.

Size: 8 cm x 0,8 cm.

Pungency: High pungency, good flavour.

First picking after transplanting: 55-65 days.

BHAVANI

F1

Dark green, short thin fruits, high pungency, smooth attractive & bright red at maturity, retain red color at drying, easy picking, uniform fruit length.

Type: Semi-erect plant.

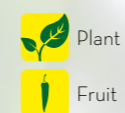

Color: Dark green & bright red, shiny smooth.

Size: 8-9 cm x 0,7 cm.

Pungency: Very high.

First picking after transplanting: 55-65 days.

JALWA F1

Highly pungent, dual purpose.

 **Type:** Spreading and vigorous, strong plants.

 **Color:** Light green.
Size: 13-14 cm x 1,2 cm.
Pungency: High.
First picking after transplanting: 60-65 days.

RED KING F1

Dual purpose, dark green, high bearing, shiny smooth.

 **Type:** Semi-erect open.

 **Color:** Unripen-dark green, matured-red.
Size: 7 cm x 0,9 cm.
Pungency: High.
First picking after transplanting: 60-65 days.

DAHAK F1

Dual purpose, medium fruit size, good bearing.

 **Type:** Semi-erect open.

 **Color:** Light green, semi-wrinkled, turn to dark red on drying.
Size: 15 cm x 1,4 cm.
Pungency: High.
First picking after transplanting: 60-65 days.

EGGPLANT

EGGPLANT

JACQUILIN

F1

Half long fruits, shiny black skin, very high yielder.

Type: Semi-erect.

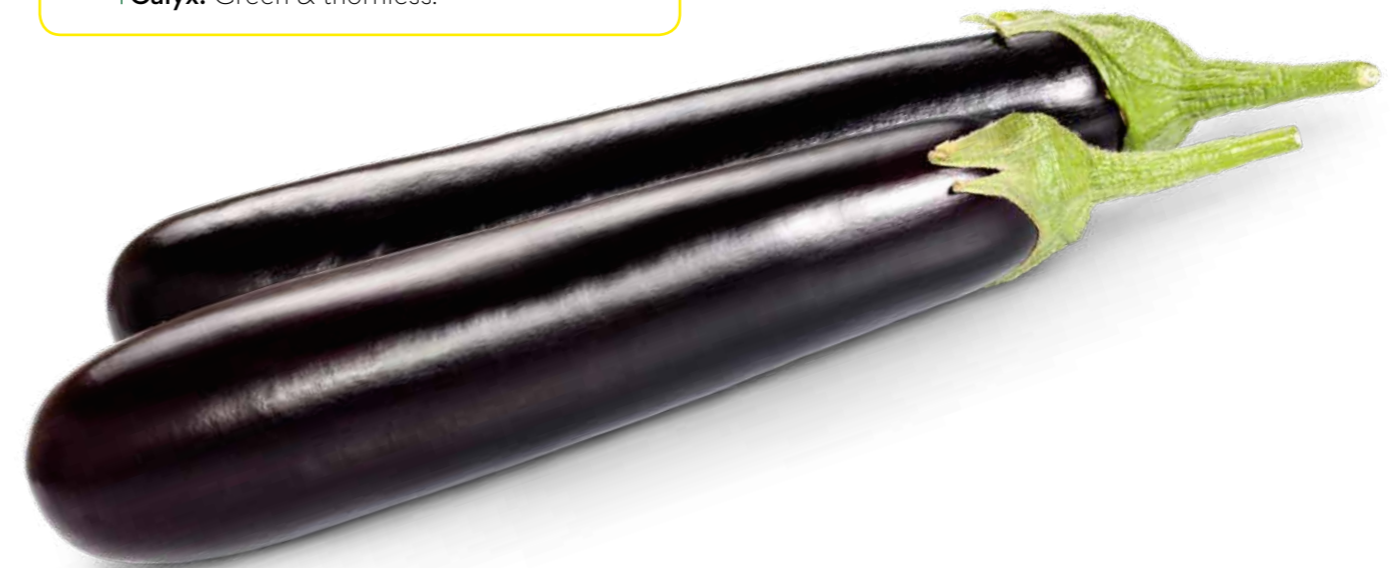

Color: Dark purple, shiny.

Weight: 150-180 g.

Shape: Long cylindrical.

Calyx: Green & thornless.

FITO PURPLE

F1

Big round, glossy purple fruit, non-spiny green calyx, attractive shape, suitable for bharta preparation, less seeded, high yield.

Type: Semi-erect, solitary fruiting, very shiny smooth fruit.

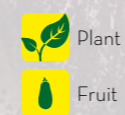

Color: Uniform shiny purple.

Weight: 250-300 g.

Shape: Round.

Calyx: Green, non-spiny.

PURPLE LONG F1

Long cylindrical, shiny purple fruits, multi fruiting, uniform shape & size.

 **Type:** Semi-erect, purple, multi fruiting.

 **Color:** Purple.
Weight: 40-50 g.
Shape: Long purple.
Calyx: Green, spineless.
Days to harvest: 40-50 days.

ABHIJEET F1

Oval to oblong fruits, green variegated, glossy, uniform high yield.

 **Type:** Semi-erect, green variegated.

 **Color:** Green variegated.
Weight: 90-120 g.
Shape: Oval to oblong.
Calyx: Green, non-spiny.
Days to harvest: 42-45 days.

NEEL GULLA F1

Oval purple to violet with white streaks, non-spiny green calyx, very heavy bearer, long harvesting period.

 **Type:** Semi-erect, attractive color uniform shape, high fruiting.

 **Color:** Pinkish purple with white streaks.
Weight: 55-70 g.
Shape: Oval.
Calyx: Green, non-spiny.

OKRA

OKRA

GREEN GOLD

F1

Tender green, uniform size fruits, wide adaptability.

Growth habit: Medium tall.

No. of branches: 2-3.

Internode length: Medium to short.

Tolerant: YVMV & Medium tolerance to ELCV.

Color: Dark green, green tender fruits.

Size: Long.

No. of ridges: 5.

SF 007

F1

Medium tall plant short internode, multi-branching, glossy dark green fruits.

Growth habit: Medium tall & erect hybrid, cut leaves.

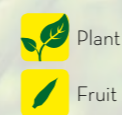

Internode length: Short to medium.

Tolerant: YVMV & ELCV.

Color: Attractive dark green tender fruits, good cooking quality.

No. of ridges: 5.

SFO 77 F1

Medium tall plant, short internode, erect branches.

-  **Growth habit:** Medium tall.
Internode length: Short to medium.
Tolerant: YVMV & ELCV.
-  **Color:** Attractive dark green, tender fruits and good cooking quality.
Size: Long.
No. of ridges: 5.

SFO 44 F1

Medium Tall Plant, short internode, more branches.

-  **Growth habit:** Medium tall.
Internode length: Short.
Tolerant: YVMV & ELCV.
-  **Color:** Attractive dark green, good cooking quality.
Size: Long.
No. of ridges: 5.

CUCUMBER

CUCUMBER

ZOYA

F1

Cylindrical long straight juicy fruits, small seed prolific bearer.

Type: Vigorous.

Color: Glossy mottled green.

Weight: 180-200 g.

Shape: Cylindrical long straight.

Size: 18-20 cm x 3-4 cm.

MEERA

F1

Very vigorous, prolific bearing, cylindrical uniform shape, tender fruits, very attractive.

Type: Green, tolerant to DM & CMV.

Color: Green to mottled green.

Weight: 140-160 g.

Shape: Cylindrical straight smooth.

Size: 16-20 cm x 3,4-4,8 cm.

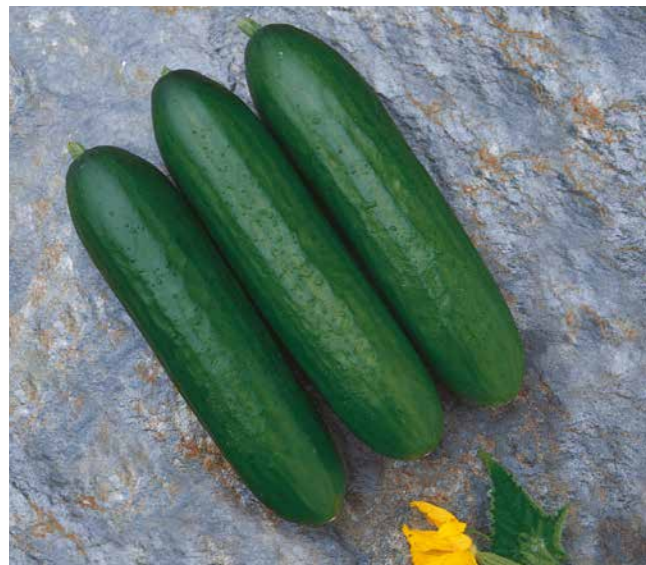

Plant

Fruit

Intermediate Resistance

RABIA F1

Very vigorous, prolific bearing, dark green, shiny cylindrical fruit sweet in taste.

 **Type:** Dark green, tolerant to DM & CMV.

 **Color:** shiny smooth skin & sweet in taste.
Weight: 100-120 g.
Shape: Cylindrical stright smooth skin.
Size: 13-18 cm x 2,5-3,5 cm.

POLYHOUSE F1

MINI ANGEL

Multi fruits, heavy yielder, dark green in color.

 **Type:** Multi fruits.

 **Color:** Dark green.
Weight: 120-150 g.
Size: 14,7 cm x 3,9 cm.
Shape: Cylindrical long straight.

IR CVVY / CMV / Px

POLYHOUSE F1

MINI MAGIC

Multi fruits, heavy yielder, dark green in color.

 **Type:** Multi fruits.

 **Color:** Dark green.
Weight: 120-150 g.
Size: 14,7 cm x 3,9 cm.
Shape: Cylindrical long straight.

IR CVVY / CMV / Px

POLYHOUSE F1

MINI WONDER

Solitary fruits, easy harvest & high yield easy to harvest & manage the crop.

 **Type:** One or two fruits.

 **Color:** Dark green.
Weight: 120-150 g.
Size: 12-14 cm x 2,7-3 cm.
Shape: Cylindrical long straight.

IR CVVY / CMV / Px / ZYMV

POLYHOUSE F1

MINI RACER

Solitary fruits, easy harvest & high yield easy to harvest & manage the crop.

 **Type:** One or two fruits.

 **Color:** Dark green.
Weight: 120-150 g.
Size: 12-14 cm x 2,7-3 cm.
Shape: Cylindrical long straight.

IR CVVY / CMV / Px / ZYMV

GHERKIN

GHERKIN

INDRA NU

F1

Heavy yielder & good plant regeneration, tolerance to virus.

 **Type:** Good vigorous, open plant habit that makes fruit harvesting easy.

 **Color:** Dark green.
Size: Attractive uniform fruits.
Shape: Cylindrical.
Spiny: Very good spines.

DEVENDRA

F1

Vigorous plant, high branching, multi-fruiting hybrid, dark green fruits with dense spines, under good management high yield, continuous fruiting, very good for processing.

 **Type:** Dark green, multi-fruiting.

 **Color:** Dark green.
Size: Attractive spiny fruits.
Shape: Cylindrical straight.
Spiny: Dense spine.

 Ccu  CVV / CMV / Px

 Plant
 Fruit
 High Resistance
 Intermediate Resistance

SQUASH

SQUASH

GREEN STAR

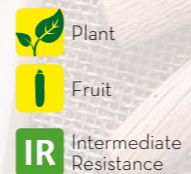

F1

Early maturing, attractive green fruits & high yield.

 **Type:** Very vigorous, open plant that makes fruit harvesting easy, long shelf life.

 **Color:** Dark green.
Size: Very homogeneous cylindrical shape.

 **IR** WMV / ZYMV / Px

MELON

MELON

ROCKY-2

F1

Round fruit, yellow lemon skin, sparsely netted, light greenish flesh, mild aroma, crispy texture, very sweet & juicy, high bearing.

Type: Galia, vigorous, yellow netted.

Color: Yellow sparsely netted.

Weight: 1,1 to 1,5 kg.

Shape: Round.

Flesh: Greenish white color, crispy & sweet.

SONA

F1

Golden yellow fruit, white-greenish flesh, juicy & crispy.

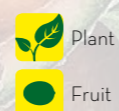

Color: Golden-yellow.

Weight: 900 g - 1,2 kg.

Shape: Rounded oval shape.

Flesh: White firm flesh, juicy and crispy.

Texture: Smooth rind.

Plant

Fruit

WATERMELON

WATERMELON

GULFAM F1

Green, dragon skin, very sweet, heavy yielder.

 **Type:** Vigorous, with excellent flesh color.

 **Color:** Light green rind with dark green stripes.

Weight: 8-10 kg.

Shape: Oval to oblong.

Flesh: Crimson red, few seeds.

Sweetness TSS (%): 12-13.

MAHIMA F1

Cylindrical fruit, ice box type, crispy red flesh with few seeds.

 **Type:** Vigorous, with excellent flesh color.

 **Color:** Uniform bluish black skin.

Weight: 3-5 kg.

Shape: Cylindrical.

Flesh: Dark red, small seeds.

Sweetness TSS (%): 12-13.

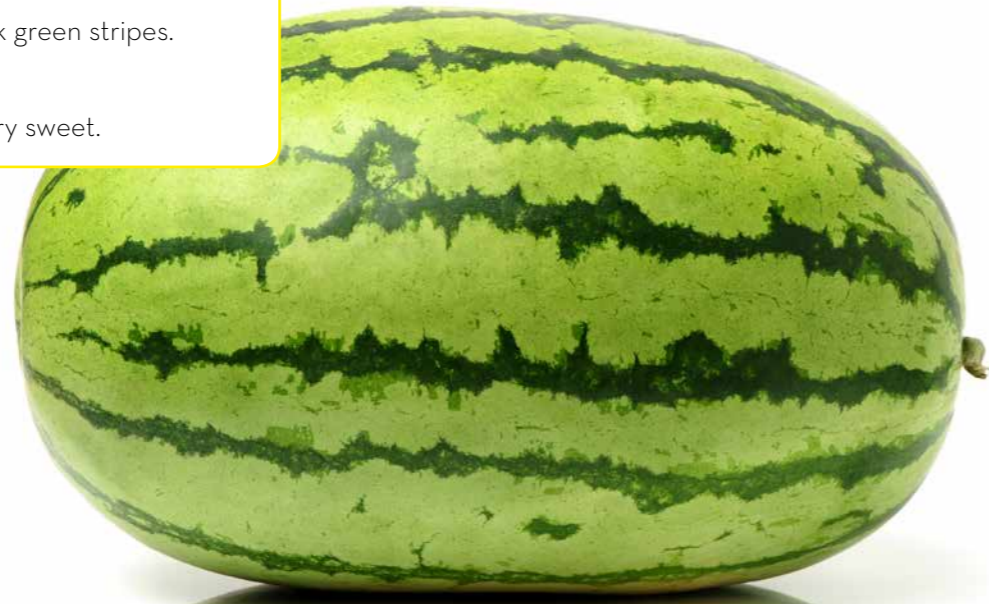

MANDIRA

F1

Early, oval to oblong, big fruit, green with dark stripes, red flesh, crispy, small seeds, high yielding & tolerant to virus.

 **Type:** Oval to oblong, uniform fruit size, high yield.

 **Color:** Green with dark green stripes.
Weight: 9-10 kg.
Shape: Oblong.
Flesh: Red crispy & very sweet.

MEGHNA

F1

Fruit oblong, skin green with dark green stripes, large fruit early, tolerant to virus, red flesh, crispy, very productive.

 **Type:** Dark green striped, oblong fruit.

 **Color:** Green with dark green stripes.
Weight: 9-10 kg.
Shape: Oblong.
Flesh: Red crispy & very sweet.

BITTER GOURD

BITTER GOURD

LEADER

F1

Vigorous plant, uniform shape, prolific fruit bearing capacity.

Color: Dark green.

Weight: 100-120 g.

Size: 14-17 cm.

Shape: Cylindrical long, firm, spiny.

First picking: 45-50 days.

CHOTTU

F1

Small uniform fruits, good for frying.

Color: Dark green.

Weight: 35-45 g.

Size: 7-8 cm.

Shape: Spindle, spiny.

First picking: 30-40 days.

TUMBI

F1

Green to dark green, attractive, very productive.

Color: Green to dark green.

Weight: 100-120 g.

Size: 18-20 cm.

Shape: Cylindrical long.

First picking: 40-45 days.

KASATA

F1

White color, medium tubercles, long attractive & productive.

Color: White.

Weight: 180-200 g.

Size: 20-25 cm x 3,2-3,6 cm.

Shape: Cylindrical long.

First picking: 45-50 days.

BOTTLE GOURD

BOTTLE GOURD

MANYA

F1

Uniform fruit size & high yielding.

 **Type:** Early, vigorous, prolific and continuous bearing hybrid.

 **Color:** Attractive shiny green.
Weight: 800 g - 1 kg.
Size: 30-40 cm.
Shape: Cylindrical.
Flesh: White and tender flesh with good quality.

BHAVYA

F1

Very vigorous plant, cylindrical medium long, smooth, attractive uniform light green color, prolific bearing.

 **Type:** Cylindrical medium long straight, light green.

 **Color:** Light green.
Weight: 600-800 g.
Size: 26-32 cm.
Shape: Cylindrical.
Flesh: White, slow seed maturity.

NAVYA

F1

Round to pear shaped, attractive green color, high fruiting.

 **Type:** Round to pear, light green.

 **Color:** Light green.
Weight: 500-700 g.
Shape: Round to pear shaped.
Flesh: White, slow seed maturity.

SPONGE GOURD

SPONGE GOURD

CHIKNI

F1

Dark green tender fruits and high yield potential.

Type: Vigorous.

Color: Dark green.

Weight: 100-150 g.

Size: 20-25 cm.

Flesh: White.

ANAMIKA

F1

Dark green tender fruits and high yield potential.

Type: Vigorous.

Color: Dark green.

Weight: 100-150 g.

Size: 20-25 cm.

Flesh: White.

CHITRA

F1

Very vigorous, light green attractive fruits, tender medium length, high bearing, white flesh & small white seed, very good cooking quality.

Type: Light green, medium long.

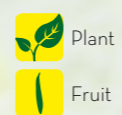

Color: Light green.

Weight: 180-200 g.

Size: 24-30 cm.

Shape: Smooth cylindrical.

RIDGE GOURD

RIDGE GOURD

RESHMA

F1

Tender straight medium long fruits, heavy bearing, straight fruits.

Type: Good vigorous, continuous bearing.

Color: Green to dark green.

Weight: 200-240 g.

Size: 40-45 cm.

Shape: Cylindrical straight tender with ridges.

REKHA

F1

Tender straight long fruit and high yielding.

Type: Vigorous and continuous bearing.

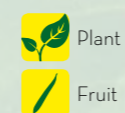

Color: Dark green.

Weight: 150-200 g.

Size: 40-50 cm.

Shape: Straight fruits, cylindrical narrow at the top.

PUMPKIN NIDHI

F1

Golden yellow flesh, good cooking quality, high yield.

Type: Very vigorous.

Color: Mottled green.

Weight: 2,5-4,0 kg.

Shape: Flat round.

Flesh: Golden yellow.

First picking: 80-85 days.

PUMPKIN KASI

F1

High vigorous, flat round fruits, yellowish orange flesh, dark green mottled, small cavity, very productive & uniform, good cooking quality.

Color: Green mottled.

Weight: 6-8 kg.

Shape: Flat round.

Flesh: Yellowish orange.

PUMPKIN Z GREEN

F1

Very vigorous, flat round fruits, dark green skin at maturity, yellowish orange flesh, very productive, good cooking quality, tolerant to virus diseases, long keeping quality.

Color: Dark green.

Weight: 3-4 kg.

Shape: Flat round.

Flesh: Yellowish orange.

PUMPKIN BALRAM

F1

Oval to Spindle shape, green mottled skin, yellowish orange flesh with good flyover & texture. Good cooking quality.

Color: Green mottled.

Weight: 8-9 kg.

Shape: Oval to spindle.

Flesh: Yellowish orange.

RADISH WHITE MARVEL F1

White straight cylindrical roots with mild pungency, good taste.

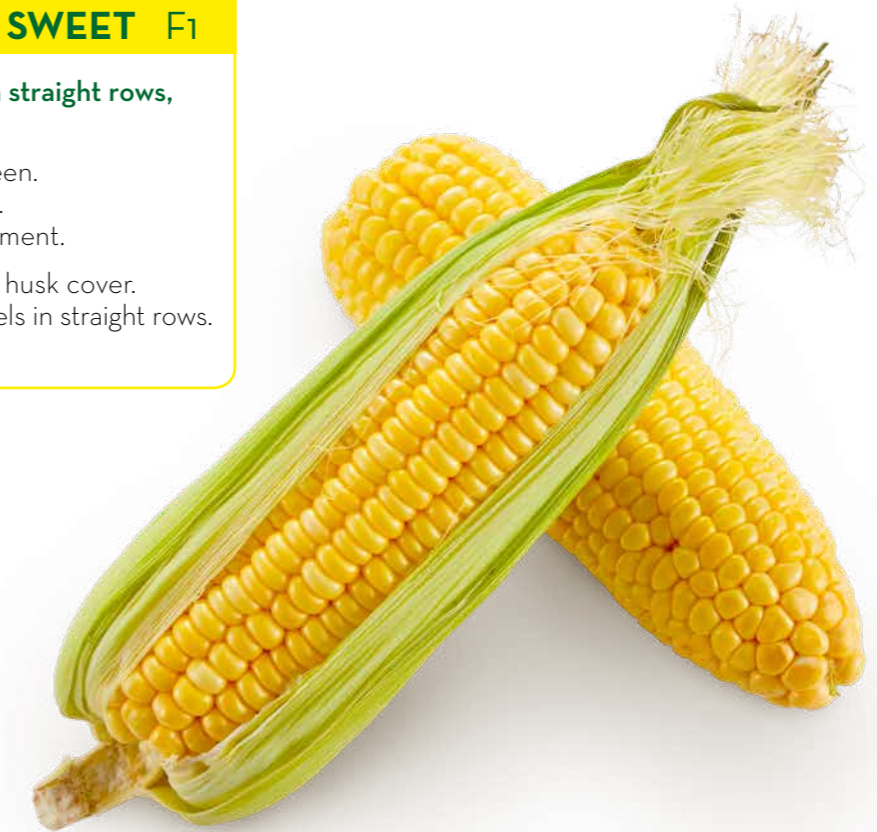

-  **Color:** White root and lush green leaves.
- Shape:** Cylindrical and attractive.
- Surface:** Smooth.
- Pungency:** Mild.
- Maturity:** 45-50 days.

SWEET CORN GOLDEN SWEET F1

Early maturity, yellow kernels in straight rows, suitable for all purpose.

-  **Type:** Medium tall, stay green.
- Maturity:** Early, 70-75 days.
- Ear placement:** Low placement.
-  **Ear characters:** Complete husk cover.
- Kernels:** Juicy, yellow kernels in straight rows.
- Sweetness:** Very sweet.

SWEET CORN GOLDEN BRIX F1

Mid maturity, yellow kernels in straight rows, suitable for green cob.

-  **Type:** Tall, stay green.
- Maturity:** Mid, 75-80 days.
- Ear placement:** Mid placement.
-  **Ear characters:** Complete husk cover.
- Kernels:** Juicy, yellow straight rows.
- Sweetness:** Sweet.

MARIGOLD RAMBHA

F1

Attractive yellow color, uniform flower size, tolerant to foliar diseases.

Type: Semi-erect bush.

Foliage color: Green.

Spread: Bush.

Color: Yellow.

Days of picking from harvest: Early harvesting.

**BEANS GANGA**

Bush type string less & dark green tender pods.

Type: Dwarf-bush type, high yielding.

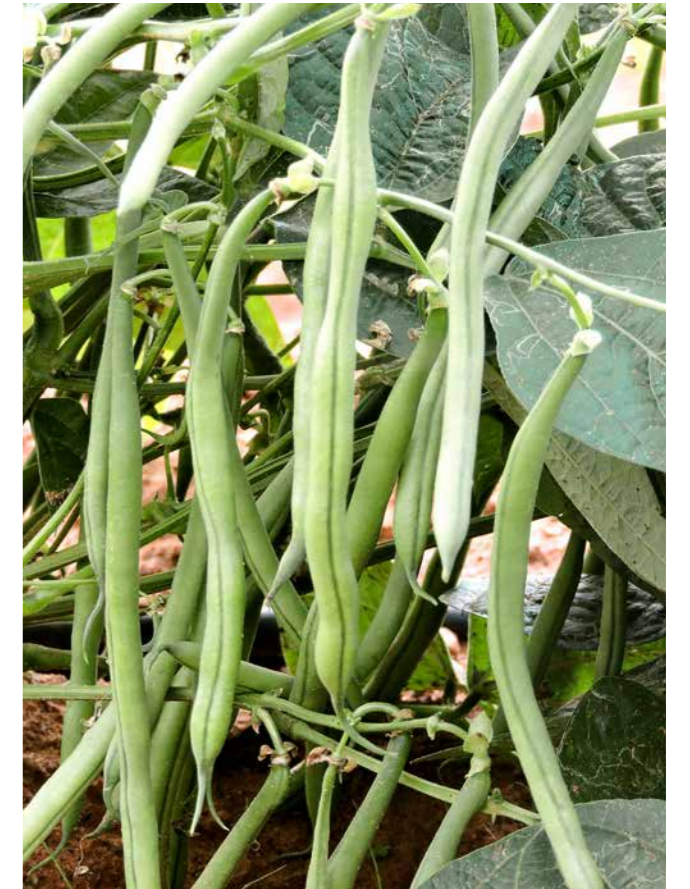

Type: Round beans with straight pods.

Color: Dark green, lustrous, straight, cylindrical string less pods, white seeds.

Size: 12-13 cm, long.

Picking: First picking in 40-45 days.

**MARIGOLD MENAKA**

F1

Attractive orange color, uniform flower size, tolerant to foliar diseases.

Type: Semi-erect bush.

Foliage color: Green.

Spread: Bush.

Color: Orange.

Days of picking from harvest: Early harvesting.

**CORIANDER MEHAK**

Slow bolting & good aroma.

Strong growing plant, attractive, large shiny with bright green succulent leaves and excellent aroma. Good resistance for bolting and side branches preferred for multi-cuts. First harvest 30-35 days. It can be planted in Kharif, Rabi & Mild summer.

FITÓ IN INDIA

Indian subsidiary

Two years after the conception of the project, in 2014 (9th July) we officially inaugurated the Semillas Fitó subsidiary in India, a strategic country for reaching all of the Southeast Asian market.

We have two locations, the Corporate main office in Yelahanka New Town and R&D office 35 km from Bangalore at Madhurai, Hobli, Doddaballapur Taluk. The Research & Development center has 10 ha. land for doing research on vegetable crops, Maize and sunflower with modern facilities

According to official figures, in 2025, India will be the most heavily populated country in the world, and today it ranks 4th in the world on the seed market. This is also a very important decision for the expansion of Semillas Fitó which has started out from zero in the country, seeking little by little to gain ground as a solid company in Asia.

our Work

Corporate Team

The subsidiary, led by Dr. Jaswant Singh, already has a team of 69 people, including Sales & Marketing, R&D, Seed Production, Logistic and Corporate all working hard to become a leader among the companies operating in the area.

When it comes to choosing such a diverse market, we have taken into account the need to produce varieties that are adapted to the area, for the Asian market we are doing Research to develop the varieties which are high yielding, disease tolerance & suitable in taste such as - Determinate Tomato, Okra, Hot Peppers. For Polyhouse crops Semillas Fitó is already well known around the world for Indeterminate tomato, Sweet Peppers and Mini Cucumbers.
