

CADICE

EXCELENTE PRODUCCION SIN RAJADO

PLANT

Hardy, medium vigour plant. Its leaf structure allows excellent aeration of the plant especially in the autumn-winter period. Medium internodes. Its high setting capacity even at high temperatures and its long and branched clusters allow a high and continuous yield during the whole cycle. Excellent performance in the presence of ToBRFV.

FRUIT

Medium to large size, with a consistent shape during the entire production cycle. Excellent flavour with a balanced ratio of acids and sugars. Intense and bright red colour when ripe. Bunches with evergreen, fleshy shafts, and sepals. Excellent resistance to cracking. High post-harvest preservation.

RESISTANCES

HR: ToMV / Fol: 0 / Forl / Pst

IR: TYLCV / ToBRFV
