

FERDINAND

FAST INCREASE IN BRIX

PLANT

Plant with medium vigour, with high-vigour rootstocks and pruning to two branches. Open plant structure, with fan-shaped clusters, which emerge from the plant, thus, enabling easier harvesting. Due to its fast entry into production, it is also very suitable for short cycles.

FRUIT

Its high degrees Brix give it a great flavour. The fruit has a deep red colour and a high post-harvest shelf life.

RESISTANCES

HR: ToMV / Fol: 0

IR: TYLCV / Mi / Ma / Mj / ToBRFV
